FOREWORD

I am delighted to write this Foreword to the work: "Essentials of Research Methods in Social Sciences and Education".

Research is the Queen of sciences and technology and no nation can hope to achieve any measure of scientific or technological advancement without proper foundation in research studies. The authors in this book have provided sound and relevant pedagogical strategies which should help both teachers and students to become more interested and more effective in Research studies. The selection and arrangement of the topics are very relevant and logical.

In this book, the authors have indeed exhibited sound pedagogical knowledge which hopefully should help to revolutionize the teaching and learning of research studies in our citadel of learning. I strongly recommend this book to all teachers and students of research studies.
